

### **GBCI Continuing Education:**

The following sessions can be self-reported for GBCI Continuing Education Units (for your LEED Credentials) using the following language. To self-report, log-in to your USGBC account, go to Credentials, and then click "Overview" on the tab to the left of the page. Then click "Report CE Hours." Click on "Education" and then copy and paste the details below:

### **Buildings as Material Banks**

**ID:** N/A

**Title:** Buildings as Material Banks: Keynote by Dr. Elma Durmišević

**Provider:** Build Reuse

**When:** October 29

**Description:**

For those that follow Industry happenings internationally you have likely heard about Project BAMB (Buildings as Material Banks). Partners from 7 countries in the EU started this venture in 2015, with the mission of "enabling a systemic shift in the building sector by creating circular solutions." Build Reuse is excited to bring Dr. Elma Durmišević whom heads the EU BAMB research group Reversible Buildings at University of Twente (2015-2019). Durmišević will be coming to speak about BAMB and the work she is involved with.

**LEED-Specific:** No

**CE Hours:** 0.5

### **Bulldozer: Demolition and Clearance of the Postwar Landscape**

**ID:** N/A

**Title:** Bulldozer: Demolition and Clearance of the Postwar Landscape: Keynote by Francesca Russello Ammon

**Provider:** Build Reuse

**When:** October 28

**Description:**

Francesca Russello Ammon is Associate Professor of City & Regional Planning and Historic Preservation at the University of Pennsylvania's Stuart Weitzman School of Design. She is a cultural historian of urban planning and the built environment. Her research focuses on the social, material, and cultural life of North American cities, from World War II to the present. She is particularly interested in the history of urban revitalization, with an emphasis on urban renewal; the dynamic relationship between cities and nature; public history as a tool for community-based research and engagement; and the ways that visual culture has shaped understanding of what cities are, have been, and should be. Ammon is the author of *Bulldozer: Demolition and Clearance of the Postwar Landscape* (Yale University Press, 2016), winner of the 2017

Lewis Mumford Prize for the best book on American city and regional planning history. In her current research, she is studying the relationships between urban renewal and historic preservation in the cities of Philadelphia and Montreal.

**LEED-Specific:** No

**CE Hours:** 1.0

### **Heritage and Waste – Defining a Research Agenda**

**ID:** N/A

**Title:** Heritage and Waste- Defining a Research Agenda: Presentation by Susan Ross

**Provider:** Build Reuse

**When:** October 28

**Description:**

Recent attention to deconstruction, salvage and reuse in historic preservation research that illuminates the relationship between heritage and waste, suggest the need for a more integrated research agenda. This includes research needed to understand and document deconstruction histories, to address barriers to salvage in conservation frameworks, and to enhance the impacts of all types of building and materials reuse. This session is intended as a check in with the “decon & reuse” sector to ensure these enquiries lead to useful answers, including relevant project and policy strategies for diverse practical contexts. It builds on the October 2018 symposium 'Heritage in Reverse: Material Values, Waste and Deconstruction' held at Carleton University in Ottawa, which included a panel of recent BMRA graduate student presenters.

Join us at DRC19 with Susan Ross, Architect (OAQ) and Associate Professor, Carleton University (Ottawa, Canada)

**LEED-Specific:** No

**CE Hours:** 1.0

### **Nurturing Salvage from Commercial Deconstruction**

**ID:** N/A

**Title:** Nurturing Salvage from Commercial Deconstruction: Amanda Kaminsky, Lauren Sparandara

**Provider:** Build Reuse

**When:** October 29

**Description:**

Google and Building Product Ecosystems will discuss current attempts to increase the salvage of reusable material resources from commercial buildings in the Bay Area and beyond. Please join Lauren Sparandara, Sustainability Manager, Google and Amanda Kaminsky, Founder + Principal, Building Product Ecosystems to discuss commercial salvage drivers, challenges encountered, strategies being learned, and useful resources available to streamline collective implementation as we evolve toward increasingly restorative, circular design and construction frameworks.

**LEED-Specific:** No

**CE Hours:** 1.0

### **Deconstruction in Portland: Lessons Learned from the Field**

**ID:** N/A

**Title:** Deconstruction in Portland: Lessons Learned from the Field: Shawn Wood, Jackie Kirouac-Fram

**Provider:** Build Reuse

**When:** October 29

**Description:**

For twenty years, the ReBuilding Center in Portland, Oregon, pioneered deconstruction and honed the art and science of taking buildings apart piece by piece, salvaging useful parts for reuse. With the assistance and support of the ReBuilding Center, the City of Portland passed an ordinance in 2016 mandating deconstruction of all residential buildings built during or prior to 1916, with the goal of widespread adoption of deconstruction as environmentally superior to mechanical demolition. Three years later, the ReBuilding Center closed its Deconstruction Services, exiting a sector that is now well-serviced by several for-profit firms that emerged in the years following the ordinance and the market it created. If your organization or municipality is considering advocating an ordinance mandating or supporting deconstruction in your region, this session will present you with some lessons learned from our efforts in Portland. We'll talk about what worked and what we could have done better, and share some insights from both the city and the nonprofit perspective.

**LEED-Specific:** No

**CE Hours:** 1.0

### **Deconstruction & Reuse Crosswalk to LEED Materials & TRUE Waste**

**ID:** N/A

**Title:** Connecting TRUE Waste to Deconstruction & Reuse in Buildings and Operations: Kathleen A. Hrabovsky

**Provider:** Build Reuse

**When:** October 29

**Description:** Join us for an introduction to the LEED v4 and v4.1 Materials and Resources Credits that directly relate to the Deconstruction & Reuse movement and how a focus on TRUE Zero Waste can propel the Deconstruction & Reuse movement to the forefront in the design, demolition, construction and building operations phases of the building industry.
